

How to Enable Transport Layer Security (TLS) 1.2

1. From your internet browser, select **Tools**, then **Internet Options**.
2. Click the **Advanced Tab**, and scroll down to the **Security** section.

3. Ensure TLS 1.2 is checked, if not, check **TLS 1.2** and select – Apply, OK.

4. Do not uncheck TLS 1.0 and 1.1, as other third-party sites that have not yet enabled LS 1.2 will be adversely affected.
